Deep Tree

Let's do this activity to know the position of a particular species in the **Evolution path**.

Step – 1

Type the URL in the browser. Click 'Play Game' button then use your personal or school id to login. Otherwise use Guest Pass to enter. Then click the DEEP TREE icon that is given below The Evolution Lab to start the activity.

Step – 2

Input the common name of any animal in the SEARCH tab given at the bottom of the activity window, select the appropriate Zoological name from the list appeared.

Step – 3

The Classification and the place of the species in the animal Kingdom can be viewed by clicking the Icon placed next to the search tab.

Step – 4

Two different species can be compared by clicking on the RELATE button given at the bottom of the activity window. The relation between those species can be learnt by clicking the DNA icon appeared.
