13. Several statements are given here in reference to cone cells which of the following option indicates all correct statements for cone cells ?

    Statements

    (i) Cone cells are less sensitive in bright light than Rod cells

    (ii) They are responsible for colour vision

    (iii) Erythropsin is a photo pigment which is sensitive to red colour light

    (iv) They are present in fovea of retina

    a. (iii), (ii) and (i)
    b. (ii) , (iii) and (iv)
    c. (i), (iii) and (iv)
    d. (i), (ii) and (iv)

14. Which of the following statement concerning the somatic division of the peripheral neural system is incorrect?

    a. Its pathways innervate skeletal muscles
    b. Its pathways are usually voluntary
    c. Some of its pathways are referred to as reflex arcs
    d. Its pathways always involve four neurons

15. When the potential across the axon membrane is more negative than the normal resting potential, the neuron is said to be in a state of

    a. Depolarization
    b. Hyperpolarization
    c. Repolarization
    d. Hypopolarization

16. Why is the blind spot called so?

17. Sam's optometrist tells him that his intraocular pressure is high. What is this condition called and which fluid does it involve?

18. Why are we getting running nose while crying?

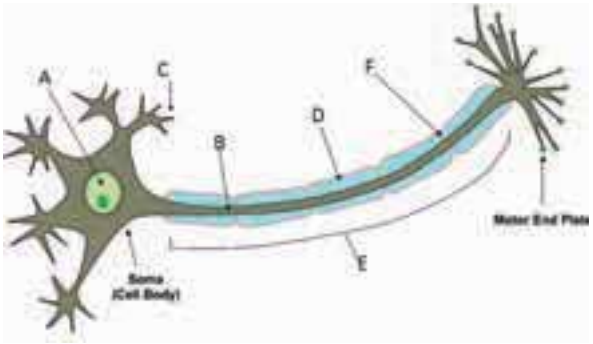
19. The action potential occurs in response to a threshold stimulus; but not at sub threshold stimuli. What is the name of the principle involved?

20. Pleasant smell of food urged Ravi to rush into the kitchen. Name the parts of the brain involved in the identification of food and emotional responses to odour.

21. Cornea transplant in humans is almost never rejected. State the reason.

22. At the end of repolarization, the nerve membrane gets hyperpolarized. Why?

23. Label the parts of the neuron.



24. The choroid plexus secretes cerebrospinal fluid. List the function of it.

25. What is the ANS controlling centre? Name the parts that are supplied by the ANS.

26. Why the limbic system is called the emotional brain? Name the parts of it.
