Careers in Neural Science

Career	Details
Neurobiologist	Studies the biology of the nervous system.
https://en.wikipedia.org/wiki/Neuroscience	
Neuroanatomist	Studies the structure (anatomy) of the nervous system.
https://en.wikipedia.org/wiki/Neuroanatomy	
Electroneurodiagnostic Technician	Records electrical activity from the brain (electroencephalograms; evoked potentials) and spinal cord
https://en.wikipedia.org/wiki/Intraoperative_neurophysiological_monitoring.	
Neuroscience Nurse	Nurse who cares for patients with neurological disorders and assists other neuroscience-related health care professionals.
http://aann.org/	
Neuropharmacologist	Studies the action of drugs on the nervous system and/or behavior.
https://en.wikipedia.org/wiki/Neuropharmacology	
Neurophysiologist	Studies the physiology (electrical responses) of the nervous system.
https://en.wikipedia.org/wiki/Neurophysiology	
Neuropsychologist	Studies brain/behavior relationships especially cognitive function.
https://en.wikipedia.org/wiki/Neuropsychology	
Neuroradiologist	Uses imaging methods such as X-ray, MRI, CT and angiography to diagnose diseases of the nervous system.
https://en.wikipedia.org/wiki/Neuroradiology	
Optometry (B.Opto)	the occupation of measuring eyesight, prescribing corrective lenses, and detecting eye disease.
