www.tntextbooks.in

**Radioisotopes** – They are radioactive isotopes of an element. Different isotopes of the same element have the same number of protons in their atomic nuclei but differing numbers of neutrons. They can also be defined as atoms that contain an unstable combination of neutrons and protons.

## Evaluation

1. The instrument used to measure blood pressure is
   a. Stethoscope
   b. Haemocytometer
   c. sphygmomanometer
   d. Haemoglobinometer
2. Blood smear is used to study
   a. Total RBC
   b. Total WBC
   c. Haemoglobin
   d. Differential count of WBC
3. Diluting fluid used for total RBC count is
   a. Turk's solution
   b. Toisson solution
   c. Hayem's solution
   d. Folin phenol reagent
4. Normal diastolic blood pressure is
   a. 80 mmHg b. 100 mmHg
   c.120 mmHg d.140 mmHg
5. Foetus development can be observed using
   a. Ultra sonogram b. X-Ray
   c. ECG d. EEG
6. When electrical impulses in the heart are not generated properly _____ is used
   a. EEG b. Pace maker
   c. Auto analyser d. Glucometer
7. PET scan uses
   a. Radio isotopes b. UV rays
   c. Ultra sound d. IR waves
8. Write the normal values of total RBC and WBC
9. What does a pace maker do?
10. What are the advantages of CT over other imaging techniques?
11. Enumerate the uses of stethoscope
12. Explain the working of MRI
13. How does a normal EEG appear?
14. Write the clinical significance of ultra sonogram
15. Explain the principle involved in PET scan

## Scope

https://www.tnmgrmu.ac.in

Diploma courses in,

Dialysis technology, Medical laboratory technology, Medical record science, Operation theatre and Anesthesia technology, Radiology and imaging technology, Healthcare Aide, Optometry technology.

B.Sc courses in,

Critical care technology, Medical laboratory technology, Medical record science, Operation theatre and Anesthesia technology, Radio diagnosis technology, Cardiopulmonary perfusion care technology, Optometry.

Bachelor of Science in Biomedical Engineering: As an interdisciplinary field of study, bioinstrumentation students can learn about mechanics, electricity, computing, engineering and cell biology.
