7.9.2. Contra entry

When the two accounts involved in a transaction are cash account and bank account, then both the aspects are entered in cash book itself. As both the debit and credit aspects of a transaction are recorded in the cash book, such entries are called contra entries.

Example

(i) When cash is paid into bank, it is recorded in the bank column on the debit side and in the cash column on the credit side of the cash book.

(ii) When cash is drawn from bank for office use, it is entered in cash column on the debit side and in the bank column on the credit side of the cash book.

To denote that there are contra entries, the alphabet 'C' is written in L.F. column on both sides. Contra means that particular entry is posted on the other side (contra) of the same book, because Cash account and Bank account are there in the cash book only and there are no separate ledger accounts needed for this purpose. The alphabet 'C' indicates that no further posting is required and the relevant account is posted on the opposite side.
