Points to remember

- The process of allocation of the relevant cost of a fixed asset over its useful life is known as depreciation.
- Cost of an asset is not merely the purchase price but also the expenses incurred on the asset till it is put into use including cost of trial run.
- Cost of a second-hand asset includes the initial repairs charges also.
- Under the straight line method, the book value of the asset at the end of its useful life is reduced to zero or its scrap value.
- The book value of the asset on any date is calculated by subtracting the depreciation provided to date from its original cost.
- The excess of sale proceeds of an asset over its book value represents profit on sale.
- The excess of book value of an asset over its sale price represents loss on sale.

Self-examination questions

I Multiple choice questions

AJ8IB8
