(iii) Fear of unemployment

On account of the introduction of computerised accounting system, the employees feel insecure that they may lose employment and show less interest in computer related work.

(iv) Disruption of work

When computerised system is introduced, the existing process of accounting and other works are interrupted. This results in certain changes in the working environment.

(v) System failure

The danger of a system crashing due to some failure in hardware can lead to subsequent interruption of work. This is more when no back-up is made.

(vi) Time consuming

When there is system failure, an alternative arrangement needs to be made to avoid loss of work. This consumes some time to bring the regular processes back.

(vii) Unanticipated errors not known

Unlike human beings, computers do not have the capability to judge or detect unanticipated errors in the system.

(viii) Breaches of security

The danger of viruses and hacking into the system from outside creates a strong need for security of the system. Similarly, the person who has created the specific programme can easily defraud by tampering with the original records.

(ix) Health dangers

Extensive use of computers may lead to many health problems such as eye strain, muscular complaints, back ache, etc. resulting in reducing work efficiency as well as increased medical expenditure.

Student activity

Think: "People even without accounting knowledge can work on computerised accounting system" – Do you agree?

It is possible to track the origins of figures in the accounting system, from the original source document through to figures in the end-of-year final accounts. This is called audit trail.
