Shapes of Molecule (VSEPR Theory)

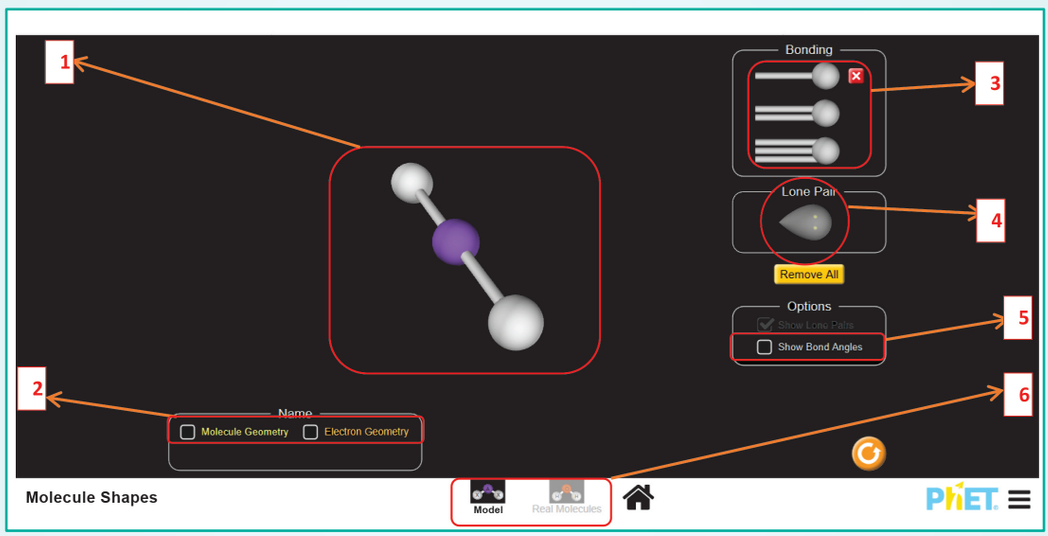

By using this tool, you will be able to create and visualise molecules with different number of bonds and lone pairs.

Steps

- Open the Browser and type the URL given (or) Scan the QR Code.
- Double click the 'models' icon given in this page. Now you will see the web page as shown in the figure.
- Now, by selecting the number of bond pairs and lone pairs using the options in the box 3 and 4 effectively, you visualize the corresponding molecular geometry.
- You can see the angles between the bonds selecting the "Show bond angles" indicated in box 5.
- You can also visualize the molecular geometry and the electron geometry by selecting corresponding option in box 2.

Structure of simple molecules:

By selecting the real molecules icon in indicated in the box 6, you will be able to see a screen as shown below. In this screen, use the dropdown menu indicated in box 7 you can select a molecule. Use the option in the box 8 you can visualise the lone pairs and bond pairs in the molecules.
