The Value of Games in Education

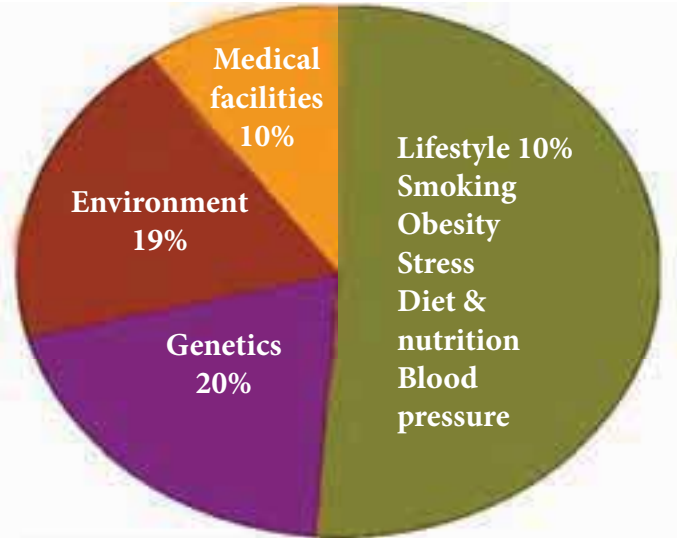
By M. Sathyapriya, XI-F

The aim of education is to enable the human personality to grow to its full stature. We have a body, a mind and a spirit. Accordingly, education aims at our physical, intellectual, spiritual and moral development.

Games are a means of keeping the body healthy and fit. Physical fitness and freedom from all kinds of ailments are the desire and ambition of every human being. Indeed, good health is the first condition of happiness in life. Those who play games generally maintain good health. Games are an excellent means of bodily exercise. Whether it is sophisticated games like hockey, football and tennis or simple games like Kabaddi, they provide the much needed exercise to the body and thus keep the body healthy and strong. Players always have a better appetite and a better digestion than those who play no games or do exercises. Games not only make the body healthy and strong, but also make it muscular.

Apart from building the body, games are an excellent recreation or pastime. Education teaches people the need and value of recreational activities. Education does not approve of the book-worm, who is lost in books all the time. Recreation is necessary. And games are among the most interesting recreations in the world. The essence of recreation is that it refreshes both body and mind and provides a means of escape from one's professional or scholarly pursuits. Thus games are very useful as a diversion for the mind.

Task: Read and understand the data presented in the pie-chart below on factors affecting health, and write an article for your school magazine highlighting the fact that it's our lifestyle that determines how healthy we remain. Write your article in about 150 words .Give a suitable title too.



The factors which affect health are given percentage-wise in the pie-chart.
