E. Introduction

What goes around comes around!

Every activity in a society, be it development of infrastructure, education, health care etc. demands resources of all kinds. Resources can be mobilized only through human efforts. This is the age of the common man – whatever the regrets some might have – and it is his point of view that matters most and I do claim to represent him in all his **ruggedness.**

Systems and schools of thought, whether it is in philosophy or politics, ethics or economics, are certainly meant for him. Universities, as the **repositories** of knowledge and the nursing ground for the **emissaries** of thought, wisdom and service, have got a prominent role
