Unit -6 (Supplementary)

Listen to the views of a leading economist R. Azhagarasan about EMI in an interview.

We live in a world where everyone likes to lead a comfortable and luxurious life, though our salaries are not enough to meet our needs. In such situation, the EMI seems to be the only option. It helps people pay for the expensive things, they have purchased, in parts as instalments. It gives monetary power to buy expensive things beyond the capacity of a common man. Otherwise, many people will never be able to buy such things. This proves beneficial for people in purchasing a house and other essential appliances and accessories. It also has some negative unavoidable results. If people are not able to pay EMI on time, they have to keep on paying the loan amount for years together with interest. If people are not able pay EMI on time, they may face serious problems such as penalty for default, repossession of the purchased items and might even be subjected to legal actions. Moreover, people may have the tendency to buy things that are not at all necessary, paying EMIs over a longer period of time. This may lead them into never ending debts. Hence, people should learn to spend within their means.
