www.tntextbooks.in

actions are move, click, double click, right click, drag and drop.

Different types of mouse available are: Mechanical Mouse, Optical, Laser Mouse, Air Mouse, 3D Mouse, Tactile Mouse, Ergonomic Mouse and Gaming Mouse.

MOST COMMONLY USED MOUSE			
SN	**Type of Mouse**	**Mechanism**	**Developed and Introduced**
1	**Mechanical Mouse**	• A small ball is kept inside and touches the pad through a hole at the bottom of the mouse. • When the mouse is moved, the ball rolls. • This movement of the ball is converted into signals and sent to the computer.	Telefunken, German Company, 02/10/1968
2	**Optical Mouse**	• Measures the motion and acceleration of pointer. • It uses light source instead of ball to judge the motion of the pointer. • Optical mouse has three buttons. • Optical mouse is less sensitive towards surface.	• In 1988, Richard Lyon, Steve Krish independently invented different versions of Optical Mouse.
3	**Laser Mouse**	• Measures the motion and acceleration of pointer. • Laser Mouse uses Laser Light • Laser Mouse is highly sensitive and able to work on any hard surface.
