Part - II : Working with Linux (Ubuntu)

Learning Objectives

- To compare Windows Operating System with Ubuntu.
- To differentiate the Window elements or icons from Ubuntu Launcher.
- To explore how to copy, delete and rename files or folders in Ubuntu.
- To explore the differences in Windows 7, Windows 8 and Windows 10.
- To compare the Windows elements between Windows 7, Windows 8 and Windows 10.
- To format Files and folders in Windows 7, Windows 8 and Windows 10.

5.14. Open Source Operating System

Open Source refers to a program or software in which the source code is available in the web to the general public free of cost.

Open Source code is typically created as a collaborative effort in which programmers continuously improve upon the source code in the web and share the changes within the community.

5.15. Linux

Linux is one of the popular Open Source versions of the UNIX Operating System. It is Open Source as its source code is freely available.

The most popular Linux server distributors are:

- Ubuntu Linux
- Linux Mint
- Arch Linux
- Deepin
- Fedora
- Debian
- CentOS
