6. How many times the loop is iterated?

```
i := 0
while i ≠ 5
  i := i + 1
```

(a) 4 (b) 5 (c) 6 (d) 0

Part II

1. Distinguish between a condition and a statement.
2. Draw a flowchart for conditional statement.
3. Both conditional statement and iterative statement have a condition and a statement. How do they differ?
4. What is the difference between an algorithm and a program?
5. Why is function an abstraction?
6. How do we refine a statement?

Part III

1. For the given two flowcharts write the pseudo code.
2. If C is false in line 2, trace the control flow in this algorithm.

```
1  S1
2  -- C is false
3  if C
4  S2
5  else
6  S3
7  S4
```

3. What is case analysis?
4. Draw a flowchart for -3case analysis using alternative statements.
5. Define a function to double a number in two different ways: (1) n + n, (2) 2 x n

Part IV

1. Exchange the contents: Given two glasses marked A and B. Glass A is full of apple drink
