Hands on practice:

- Type the following C++ Programs in Dev C++ IDE and execute. if compiler shows any errors, try to rectify it and execute again and again till you get the expected result.

1. C++ Program to find the total marks of three subjects

```
#include <iostream>
using namespace std;
int main()
{
        int m1, m2, m3, sum;
        cout << "\n Enter Mark 1: ";
        cin >> m1;
        cout << "\n Enter Mark 2: ";
        cin >> m2;
        cout << "\n Enter Mark 3: ";
        cin >> m3;
        sum = m1 + m2 + m3;
        cout << "\n The sum = " << sum;
}
```

- Make changes in the above code to get the average of all the given marks.

2. C++ program to find the area of a circle

```
#include <iostream>
using namespace std;
int main()
{
        int radius;
        float area;
        cout << "\n Enter Radius: ";
        cin >> radius;
        area = 3.14 * radius * radius;
        cout << "\n The area of circle = " << area;
}
```

3. point out the errors in the following program:

```
Using namespace std;
int main( )
{
cout << “Enter a value ”;
```
