Illustration 10.8 – C++ program to demonstrate switch statement

```
#include <iostream>
using namespace std;
int main()
{
        int num;
        cout << "\n Enter week day number: ";
        cin >> num;
        switch (num)
        {
                case 1 : cout << "\n Sunday"; break;
                case 2 : cout << "\n Monday"; break;
                case 3 : cout << "\n Tuesday"; break;
                case 4 : cout << "\n Wednessday"; break;
                case 5 : cout << "\n Thursday"; break;
                case 6 : cout << "\n Friday"; break;
                case 7 : cout << "\n Saturday"; break;
                default: cout << "\n Wrong input....";
        }
}
```

Output:

```
Enter week day number: 6
Friday
```

Illustration 10.9 – C++ program to demonstrate switch statement

```
#include <iostream>
using namespace std;
int main()
{
        char grade;
        cout << "\n Enter Grade: ";
        cin >> grade;
switch(grade)
        {
                case 'A' : cout << "\n Excellent...";
                break;
                case 'B' :
                case 'C' : cout << "\n Welldone ...";
                break;
                case 'D' : cout << "\n You passed ...";
                break;
        case 'E' : cout << "\n Better try again ...";
                        break;
                        default : cout << "\n Invalid Grade ...";
                }
```
