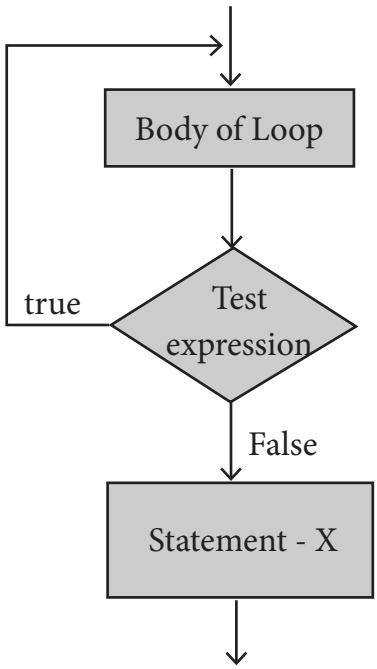
The flow control and flow chart do-while loop is shown below



Flowchart 10.8 : do-while loop control flow and do-while loop flowchart

Illustration 10.16 C++ program to display number from 10 to 1 using do-while loop

```
#include <iostream>
using namespace std;
int main ()
{
int n = 10;
do
{
        cout<<n<<", ";
        n--;
}while (n>0) ;
}
```

Output

10, 9, 8, 7, 6, 5, 4, 3, 2, 1

In the above program, the integer variable **n** is initialized to **10**. Next the value of **n** is displayed as **10** and **n** is decremented by **1**. Now, the condition is evaluated, since **9 > 0**, again **9** is displayed and **n** is decremented to **8**. This continues, until **n** becomes equal to **0**, at which point, the condition **n > 0** will evaluate to false and the do-while loop terminates.
