In function 'int main()':

[Error] 'temp' was not declared in this scope

On compilation the Program 11.28(b), the compiler prompts an error message: The variable **temp** is not accessible. Because the life time of a local variable is the life time of a block in its state of execution. Local variables die when its block execution is completed.

11.10.3 Function Scope:

- The scope of variables declared within a function is extended to the function block, and all sub-blocks therein.
- The life time of a function scope variable, is the life time of the function block. The scope of formal parameters is function scope.

Program 11.29 (a)

```
//Demo to test Function Scope//
#include<iostream>
using namespace std;
void add(int x, int y)
{
        int m=x+y; //'m' declared within function add()//
        cout<<"\nThe Sum = "<<m;
}
int main ( )
{
int a, b ;
a = 10;
b = 20;
add(a,b);
return(0);
}
```

Program 11.29 (b)

```
//Demo to test Function Scope//
#include<iostream>
using namespace std;
```
