Hands on practice:

Write C++ program to slove the following problems :

1. Program that reads two strings and appends the first string to the second. For example, if the first string is entered as Tamil and second string as nadu, the program should print Tamilnadu. Use string library header.
2. Program that reads a string and converts it to uppercase. Include required header files.
3. Program that checkos whether a given character is an alphabety or not. If it is an alphabet, whether it is lowercase character or uppercase character? Include required header files.
4. Program that checks whether the given character is alphanumeric or a digit. Add appropriate header file.
5. Write a function called zero_small ( ) that has two integer arguments being passed by reference and sets smaller of the two numbers to 0. Write the main program to access this funtion.
6. Write definition for a function sumseries ( ) in c++ with two arguments/ parameters - double x and int n. The function should return a value of type double and it should perform sum of the following series:

   x-x2 /3! + x3 / 5! - x4 / 7! + x5 / 9! -... upto n terms.

7. Program that invokes a function calc ( ) which intakes two intergers and an arithmetic operator and prints the corresponding result.

Evaluation

Part – 1

Choose the best answer

1. Which of the following header file defines the standard I/O predefined functions ?

   A) stdio.h B) math.h C) string.h D) ctype.h

2. Which function is used to check whether a character is alphanumeric or not.

   A) isalpha() B) isdigit() C) isalnum() D) islower()

3. Which function begins the program execution ?

   A) isalpha() B) isdigit() C) main() D) islower()
