Initialization

The character array can be initialized at the time of its declaration. The syntax is shown below:

char array_name[size]={ list of charecters separated by comma or a string } ;

For example,

char country[6]="INDIA";

In the above example, the text "INDIA" has 5 letters which is assigned as initial value to array country. The text is enclosed within double quotes. The memory representation is shown in Figure 13.3

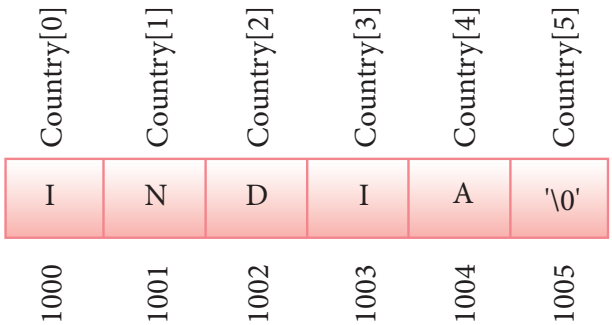

Figure 12.3

In the above memory representation, each character occupies one byte in
