```
// Function with character array as argument
#include <iostream>
using namespace std;
int main()
{
        char str[100];
void display(char s[]);
        cout<< "Enter a string: ";
        getline(cin, str);
display(str);
        return 0;
}

void display(char s[])
{
cout<< "You entered char array: " << s <<endl;
}
```

FBGHUI

output

```
Enter a string: welcome to C++ programming
You entered char array: welcome to C++ programming
```

Case Study:

(1) Write a program to accept the marks of 10 students and find the average, maximum and minimum marks.

(2) Write a program to accept rainfall recorded in four metropolitan cities of India and find the city that has the highest and lowest rainfall.

(3) Survey your neighboring shops and find the price of any particular product of interest and suggest where to buy the product at the lowest cost.
