www.tntextbooks.in

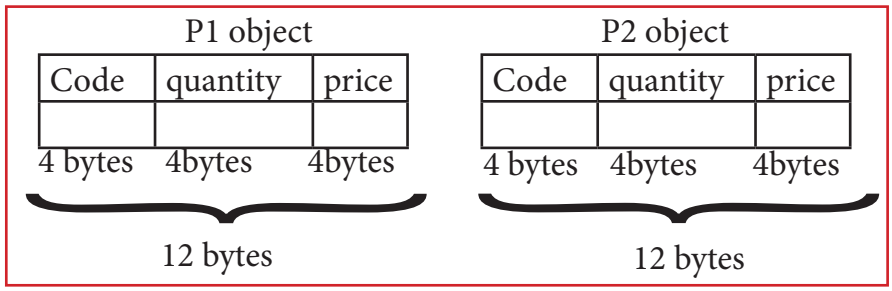
```
int main()
{
        product p1, p2;
        cout<<"\n Memory allocation for object p1 " <<sizeof(p1);
        cout<<"\n Memory allocation for object p2 " <<sizeof(p2);
        return 0;
}
```

Output:

```
Memory allocation for object p1  12
Memory allocation for object p2  12
```

Member functions assignData( ) and Print( ) belong to the common pool in the sense both the objects p1 and p2 will have access to the code area of the common pool.

Memory for Objects for p1 and p2 is illustrated:



ACTIVITY 4

What is the size of the objects s1, s2?

```
class sum
{
        int n1,n2;
        public:
        void add(){int n3=10;n1=n2=10;}
} s1,s2;
```

14.4 Referencing class members

The members of a class are referenced (accessed) by using the object of the class followed by the dot (membership) operator and the name of the member.

The general syntax for calling the member function is:

Object_name . function_name(actual parameter);
