CASE STUDY

Suppose you have a Kitty Bank with an initial amount of Rs500 and you have to add some more amount to it. Create a class 'Deposit' with a data member named 'amount' with an initial value of Rs500. Now make three constructors of this class as follows:

1. without any parameter - no amount will be added to the Kitty Bank
2. having a parameter which is the amount that will be added to the Kitty Bank
3. whenever amount is added an additional equaly amount will be deposited automatically

Create an object of the 'Deposit' and display the final amount in the Kitty Bank.
