9.3. The member function that can be accessed by an objects of bus Class is

(a) input_data() , (b) read_data() ,output_data()write_data()

(c) fetch_data() (d) All of these display_data()

9.4. The member function that is inherited as public by Class Bus

(a) input_data() , (b) read_data() , output_data()write_data()

(c) fetch_data() (d) All of these display_data()

10.

```
class x
{  int a;
public :
x()

  {}
};
class y
{  x x1;
public :
y(){}
};
class z : public y,x
{
int b;
public:
z(){}
}z1;
```

What is the order of constructor for object z1 to be invoked?

(A) z , y,x,x (B) x,y,z,x (c) y,x,x,z (D) x,y,z

PART II

Answer to the all qustions (2 Marks):

1. What is inheritance?
2. What is a base class?
