Computer Ethics And Cyber Security

Learning Objectives

After learning this chapter, the students will be able to

- To know about cyber-crimes.
- To understand the guidelines and need for ethics in cyber-world.
- To understand issues related to cyber-crimes.
- To know the functionality of firewalls and proxy servers.
- To learn aboutencryption and decryption.
- To gain knowledge on the IT Act.

17.1 INTRODUCTION

Internet is a communication media which is easily accessible and open to all. Information Technology iswidespread through computers, mobile phones and internet. There is a lot of scope and possibility for misuse of Information Technology.

Computer systems in general are vulnerable. They play an important role in the daily lives of individuals and businesses. Special care must be taken explicitly in order to ensure that the valuable data do not get into wrong hands. Hence, the data need to be protected.

A cyber-crime is a crime which involves computer and network.This is becoming a growing threat to society and is caused by criminals or irresponsible action of individuals who are exploiting the widespread use of Internet. It presents a major challenge to the ethical use of information technologies. Cyber-crime also poses threats to the integrity, safety and survival of most business systems.

Figure. 17.1 presents the types of cyber-crimes that happen across the world.
