```
                num[i] = num[i] + 1; // Traversing the array elements sequentially
and adding 1 to each element
        }
        cout<< "\n After incrementing, the values in array num....." <<endl;
        for (int j=0; j<5; j++)
        {
                cout<<num[j] <<endl; // Traversing the array elements
sequentially and printing each one of them
        }
}
```

வெளியீடு:

```
        Enter value 1= 10
         Enter value 2= 20
         Enter value 3= 30
         Enter value 4= 40
         Enter value 5= 50
        After incrementing, the values in array num.....
        11
        21
        31
        41
        51
```

10 மாணவர்களின் மதிப்பெண்களை படித்து அவற்றின் சராசரியை காண ஒரு நிரல்

```
#include <iostream>
using namespace std;
int main()
{
        int marks[10], sum=0;
        float avg;
        for(int i=0; i<10; i++)
         {
                 cout<< "\n Enter Mark " << i+1 << "= ";
                cin>> marks[i];
                sum=sum+marks[i];
         }
        avg=sum/10,0;
        cout<< "\n The Total Marks: " << sum;
        cout<< "\n The Average Mark: " <<avg;
}
```
