	Volume	Equation of state	Work done (ideal gas)	Indicator diagram (PV diagram)
	increases	PV = Constant	$W=\mu RT \ln\left(\frac{V_f}{V_i}\right) > 0$	
	Decreases		$W=\mu RT \ln\left(\frac{V_f}{V_i}\right) < 0$	
	increases	$\frac{V}{T}$ = Constant	$W=P\,[V_f - V_i]=P\Delta V > 0$	
	decreases		$W=P\,[V_f - V_i]=P\Delta V < 0$	
	Constant	$\frac{P}{T}$ = Constant	Zero	
				
	increases	PV^{γ} = Constant	$W=\frac{\mu R}{\gamma - 1}(T_i - T_f) > 0$	
	Decreases		$W=\frac{\mu R}{\gamma - 1}(T_i - T_f) < 0$
