Osmosis

By using this tool, you will be able to visualise the process of osmosis which gives a clear understating of this process.

Please go to the URL
https://pbslm-contrib.s3.amazonaws.com/WGBH/arct15/SimBucket/Simulations/osmosis/content/index.html
(or)
Scan the QR code on the right side

B164_11_CHE_EM

Steps

- Open the Browser and type the URL given (or) Scan the QR Code.
- Now you will see the webpage as shown below.
- The two compartments were separated by a semipermeable membrane.
- On the left side (Box 2) contains pure solvent (water) and right side contains solution (solute + water).
- The number of solvent molecules (water) on each side is shown in the area designated by box 3 and 5.
- Now you can see the water molecules moving from solvent side to solution side through the membrane. It reflects in the change in number of water molecules on either side.
- You can restart the simulation by clicking the reset button in box 1
