CASE STUDY

The manager of a medium- sized business is considering the introduction of computerised accounting system. Some staff feels that it is an opportunity to learn new skill. The manager has promised free training for their staff. So, the staff realise that their own skill can be enhanced. Also, there is a demand for highly skilled staff. But, some staff feels threatened by these changes. They feel that they may not be able to learn new skill. Moreover, some of them are nearing their retiring age. So they think that it is not needed for them. But the manager expects the cooperation from all the staff.

Now, discuss on the following points:

- Will it be expensive for the business to introduce computerised accounting system?
- Will everyone get the access to use the computers? In such a case, how to protect data?
- "People at the retirement age are not required to learn new skill" – Do you think so?
- What are the factors to be considered by the managers before introducing CAS?

To explore further

Is it possible to maintain the confidentiality in computerised accounting system? How is it possible?
