Botanical Survey of India

On 13 February 1890, a survey was formally constituted and designated as the Botanical Survey of India. After independence, the need was felt for a more comprehensive documentation of the country's plant resources to boost the economy. Padmashree **Dr.E.K.Janaki Ammal** was appointed as officer on special Duty on 14th Oct 1952. Then reorganization plan was finally approved by the Govt. of India on 29 March 1954, with Calcutta as the headquarters of BSI. Jammu Tavi Botanical Garden has been named after Dr. E. K. Janaki Ammal.

expressing the relationship between the organisms.

Taxonomists have assigned a method of classifying organisms which are called **ranks.** These taxonomical ranks are hierarchical. The scheme of classification has to be flexible, allowing newly discovered living organisms to be added where they fit best.

5.9 Need for Classification

- Understanding the classification of organisms can give an insight into other fields and has significant practical value.
- Classification helps us to know about different taxa, their phylogenetic relationship and exact position.
- It helps to train the students of plant sciences with regard to the diversity of organisms and their relationship with other biological branches.

5.10 Types of classification

Taxonomic entities are classified in three ways. They are (1) Artificial classification, (2) Natural classification (3) Phylogenetic classification.

5.10.1 Artificial system of classification

Carolus Linnaeus (1707 -1778) was a great Swedish Botanist and said to be the "**Father**

24 classes recognized by Linnaeus in his *Species Plantarum* (1753) on the basis of stamens.

No.	Classes	Characters
1	Monandria	stamen one
2	Diandria	stamens two
3	Triandria	stamens three
4	Tetrandria	stamens four
5	Pentandria	stamens five
6	Hexandria	stamens six
7	Heptandria	stamens seven
8	Octandria	stamens eight
9	Ennandria	stamens nine
10	Decandria	stamens ten
11	Dodecandria	stamens 11-19
12	Icosandria	stamens 20 or more, on the calyx
13	Polyandria	stamens 20 or more, on the receptacle
14	Didynamia	stamens didynamous; 2 short, 2 long
15	Tetradynamia	stamens tetradynamous; 4 long, 2 short
16	Monadelphia	stamens monadelphous; united in 1 group
17	Diadelphia	stamens diadelphous; united in 2 groups
18	Polyadelphia	stamens polyadelphous; united in 3 or more groups
19	Syngenesia	stamens syngenesious; united by anthers only
20	Gynandria	stamens united with the gynoecium plants
21	Monoecia	monoecious
22	Dioecia	plants dioecious
23	Polygamia	plants polygamous
24	Cryptogamia	flowerless plants
