5	Action of Conc.H_2SO_4: Take a small amount of a salt in a dry test tube, add about 0.5mL of Conc. H_2SO_4 and gently heat it in the Bunsen flame	A colourless gas evolves. It gives a dense white fumes when a glass rod dipped in liquid ammonia is brought close to its mouth	Presence of chloride
		A reddish brown gas turning moist fluorescein paper green evolves	Presence of bromide
		Reddish brown gas turning acidified ferrous sulphate paper green evolves.	Presence of nitrate
6	Action of MnO_2 and Conc. H_2SO_4: Take a small amount of salt in a test tube, add pinch of MnO_2 and about 0.5mL of Conc. H_2SO_4 and gently heat it in the Bunsen flame	A greenish yellow gas turning starch iodide paper blue evolves	Presence of chloride
		A reddish brown gas turning moist fluorescein paper red evolves	Presence of bromide
7.	Action of Conc. H_2SO_4 and copper turning: Take a small quantity of salt in a dry test tube and add few copper turnings and about 1mL of Conc. H_2SO_4. Gently heat it	A reddish brown gas with fishy odour turning a moist ferrous sulphate paper brown evolves	Presence of nitrate.
8.	Action of dil. NaOH solution: To a small quantity of a salt add about 1mL of dil. NaOH solution and gently heat it.	A colourless gas with the pungent smell giving dense white fumes with a glass rod dipped in con. HCl evolves	Presence of ammonium salt
9.	Chromyl chloride test: Take a small quantity of salt in a test tube, add a pinch of potassium dichromate and three drops Conc. H_2SO_4. Gently heat it. Pass the vapours to enter another test tube containing about 0.5mL of sodium hydroxide. If a yellow solution is obtained, add about 1mL each of dil. acetic acid and lead acetate	A yellow ppt is obtained	Presence of chloride.
