UNIT III SERVICE BUSINESS - I

CHAPTER 14

TRANSPORTATION

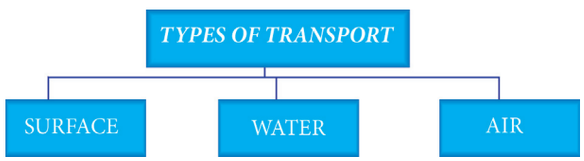

Learning Objectives

To enable the students to

i. understand the different types of Transport
ii. explain the services of transport to business
iii. know the documents used in transport
iv. know about Common Carrier

Introduction

Transport service facilitates the smooth carriage of goods from the place of producer to the place of consumer. Transport also facilitates travelling of people from one place to another place. The different types of transport are given below.

14.01 Meaning and Definition of Transport

The term 'transport' includes all the clerical, mental and manual occupation involved in the operation of road, rail, canal, sea and air transport. Goods have no use unless they are made available at a place where and when they are wanted. Transport is an integral part of Commerce. It is a means to carry men and materials from one place (production) to another resulting in creation of place and time utilities. It removes the hindrance of place.

According to K.K. Sexena, "the transport system acts with reference to the area it serves in the same way as a candle does in a dark room".

14.02 Types of Transport

Transport system can be classified in different ways depending on the types of transport, the ways and means of transport and also the motive power used in transport.

A. Surface Transport

Transport of people and goods by land vehicles is known as Surface transport. It is also called as 'Land Transport'.

1. Pack Animals

Animals like horse, mule, donkey camel, and elephant etc., are used for carrying small loads in backward areas, hilly tracks, forest regions and deserts known as pack animals. Generally, the pack animals serve areas which are inaccessible to modern means of transport. Animal transport has also played a significant role where there is no road and railway transport.
