Points to Remember:

- A computer program is a set of statements or instructions to perform a specific task.
- There are two kinds of statements used in C++, viz Null and Compound Statement.
- Control Statement are statements that alter the sequence of flow of instructions.
- There are three kinds of statement used in C++. (1) Sequence Statement (2) Selection Statement (3) Iteration Statement
- *If* and *Switch* are Selection Statements.
- The Conditional Operator is an alternative for 'if else Statement'.
- The Switch Statment is a multi-way branching statement.
- Iteration Statement (looping) is use to execute a set of statements repeatedly until a condition is satisfied.
- There are three kinds Iteration Statements supported. (1) *for* (2) *While* (3) *do-While*.
- In C++ three Jump Statment are used (1) *goto* (2) *break* (3) *continue*

Evaluation

SECTION – A

Choose the correct answer

1. What is the alternate name of null statement?
   (A) No statement
   (B) Empty statement
   (C) Void statement
   (D) Zero statement

2. In C++, the group of statements should be enclosed within:
   (A) { } (B) [ ]
   (C) ( ) (D) < >

3. The set of statements that are executed again and again in iteration is called as:
   (A) condition (B) loop
   (C) statement (D) body of loop

4. The multi way branch statement:
   (A) if (B) if … else
   (C) switch (D) for

5. How many types of iteration statements?
   (A) 2 (B) 3
   (C) 4 (D) 5

6. How many times the following loop will execute? for (int i=0; i<10; i++)
   (A) 0 (B) 10
   (C) 9 (D) 11
