Hands on practice:

1 Define a class Employee with the following specification

private members of class Employee

empno- integer

ename – 20 characters

basic – float

netpay, hra, da, - float

calculate () – A function to find the basic+hra+da with float return type

public member functions of class employee

havedata() – A function to accept values for empno, ename, basic, hra, da and

call calculate() to compute netpay

dispdata() – A function to display all the data members on the screen

Evaluation

SECTION – A

Choose the correct answer

1. The variables declared inside the class are known as

   (A) data (B) inline
   (C) method (D) attributes

2. Which of the following statements about member functions are True or False?

   i) A member function can call another member function directly with using the dot operator.

   ii) Member function can access the private data of the class.

   (A) i)True, ii)True (B) i)False, ii)True
   (C) i)True, ii)False (D) i)False,ii)False

3. A member function can call another member function directly, without using the dot operator called as

   (A) sub function
   (B) sub member
   (C) nesting of member function
   (D) sibling of member function

4. The member function defined within the class behave like ..... functions

   (A) inline (B) Non inline
   (C) Outline (D) Data

5. Which of the following access specifier protects data from inadvertent modifications?

   (A) Private (B) Protected
   (C) Public (D) Global

6. class x

```
{
    int y;
    public:
    x(int z){y=z;}
    } x1[4];
int main()
{  x  x2(10);
  return 0;}
```

How many objects are created for the above program

(A) 10 (B) 14 (C) 5 (D) 2

7. State whether the following statements about the constructor are True or False.

   i) constructors should be declared in the private section.

   ii) constructors are invoked automatically when the objects are created.

   (A) True, True (B) True, False
   (C) False, True (D) False, False
