IV. Detailed answer

21. Explain the Big bang Theory.
22. Describe the structure of the Sun.
23. Draw the four positions of the Sun during equinoxes and Solstices and briefly explain them.

V. Additional questions

1. Lines of latitude
   a. begin with the prime meridian
   b. are designated by being East or West from an origin;
   c. are of equal length;
   d. become shorter away from the equator;
   e. none of the above.
2. All of the following are true statements about longitude, except
   a. has its origin at the prime meridian;
   b. extend east and west to 180 degrees longitude;
   c. are relatively equal in length
   d. could be determined by sailors using a device called the sextant
   e. could not be determined by sailors until the introduction of the chronometer.
3. You are told that the earth rotates on its axis at a speed of about 1042 miles per hour. Given that the rotation occurs in 24 hours, what is the circumference of the earth?
   a. 40,000 miles
   b. 25,000 miles
   c. 2400 miles
   d. 76,000 miles
   e. none of the above.
4. How many degrees of a full circle can you travel eastward or westward from the zero (prime) Meridian before heading back toward the Prime Meridian?
   a. 60 degree.
   b. 90 degree.
   c. 360 degree.
   d. 180 degree.
   e. none of the above.
5. 0 degree longitude and 0 degree. latitude is located:
   a. over central Australia;
   b. in Brazil
   c. in the Atlantic south and west of Africa
   d. at the South Pole
   e. none of the above.
6. To find longitude, a sailor needs to know
   a. the elevation of the sun above the horizon
   b. the latitude at the prime meridian;
   c. local time and the time at another line of longitude
   d. the relative space
   e. none of the above.
7. Latitude and longitude is a spherical coordinate system with its origin at 0 degree latitude and 0 degree longitude. This point is in the Atlantic Ocean just below the African country of the Ivory Coast. Locations are measured in degrees away from this origin in north, south, east and west directions. 23.34 degree S and 46.38 degree W is probably located in:
   a. Russia
   b. Canada
   c. South Africa
