Evaluation

I Choose the best answer

1. Which of the following atmospheric layer known as the weather layer?
   a. Troposphere b. Stratosphere
   c. Thermosphere d. Mesosphere
2. Which is the most suitable layer for flying Jet air craft?
   a. Troposphere b. Stratosphere
   c. Mesosphere d. Exosphere
3. Which of the following atmospheric structure absorbs the ultra violet rays of the sun and protect the earth from intense heating?
   a. Troposphere b. Ozonosphere
   c. Thermosphere d. Exosphere
4. An imaginary line connecting the places having equal atmospheric temperature is called
   a. Isotherm b. Isohytes
   c. Isobar d. Contour
5. Speed of the wind is measured by
   a. Barometer b. Hygrometer
   c. Thermometer d. Anemometer
6. What happens to atmospheric pressure with increase in altitude?
   a. It remains constant
   b. It increases
   c. It decreases
   d. It constantly fluctuates
7. Which one of the following winds is the example of secondary winds?
   a. Trade winds b. Westerlies
   c. Polar easterlies d. Monsoon
8. Albedo means
   a. Amount solar radiation reflected by the surface
   b. Amount moisture absorbed by the surface
   c. Amount moisture present in air
   d. Amount of molecules present in air
9. Which instrument is used to measure the relative humidity in air?
   a. Hygrometer b. Barometer
   c. Thermometer d. Altimeter
10. Convectional rainfall mostly occurs in _____?
    a. Temperate region
    b. Equatorial region
    c. Tundra region
    d. Desert region

II Very short Answer.

11. Define lapse rate.
12. What is mountain wind?
13. Draw and label the pressure belts on the globe.
14. Differentiate rainfall and snow.
15. What are the stages of formation of temperate cyclone?

III Short Answer.

16. Why is ozone layer depleting?
17. Draw the diagram for heat budget and mark the radiation emit.
18. How is an urban heat island formed?
19. Differentiate between sea breeze and land breeze.
20. List the forms of precipitation.
