Archaeology and epigraphy are the tools that provide rich information for the historian to understand earlier periods of history. Archaeology is particularly important because excavations reveal the nature of urban morphology, that is, layout of the city and construction of buildings. They also provide concrete information about the material culture of people in the past, such as the metals that were known, materials and tools they used, and the technology they employed.

The archaeological finds in the Gangetic regions give us solid proof about the nature of the urban centres established in the region in course of time. Epigraphical evidence is scanty for the period. The most widely known are the edicts of Ashoka, which have been discovered in many parts of the country. In fact, the reconstruction of the Mauryan period to a great extent became possible only after the Brahmi script of the inscriptions at Sanchi was deciphered by James Prinsep in 1837. Information about other edicts in other parts of the country also became available at that time. It must be remembered that these were the oldest historical artefacts found in India in the nineteenth century, until archaeological excavations unearthed the Indus valley towns of Harappa and Mohenjo-Daro in the twentieth century. All the edicts began with a reference to a great king, "Thus spoke *devanampiya* (beloved of the gods) *piyadassi* (of pleasing looks)", and the geographical spread of the edicts make it clear that this was a king who had ruled over a vast empire. But who was this king? Puranic and Buddhist texts referred to a *chakravartin* named Ashoka. As more edicts were deciphered, the decisive identification that *devananampiya piyadassi* was Ashoka was made in 1915. One more edict when deciphered, which referred to him as *devanampiya* Ashoka, made reconstruction of Mauryan history possible.

Let us now turn to two later sources. The first is the rock inscription of Junagadh, near Girnar in Gujarat. This was carved during the reign of Rudradaman, the local ruler and dates back to 130–150 CE. It refers to Pushyagupta, the provincial governor *(rashtriya)* of Emperor Chandragupta. This is of importance for two reasons: (i) it indicates the extent of the Mauryan Empire, which had expanded as far west as Gujarat and (ii) it shows that more than four centuries after his death, the name of Chandragupta was still well known and remembered in many parts of the country. A second source is a literary work. The play *Mudrarakshasa* by Visakhadatta was written during the Gupta period, sometime after the 4th century CE. It narrates Chandragupta's accession to the throne of the Magadha Empire and the exploits of his chief advisor Chanakya or Kautilya by listing the strategies he used to counter an invasion against Chandragupta. This play is often cited as a corroborative source since it supports the information gathered from other contemporary sources about Chandragupta. It is important to note from both these sources that the fame of Chandragupta had survived long after he was gone and became imbibed in popular lore and memory. They thus attest to the significance of oral traditions, which are now accepted as an additional valid source of history.

4.1 Rise of Magadha under the Haryanka Dynasty

Bimbisara

Among the 16 *mahajanapadas*, Kasi was initially powerful. However, Kosala became dominant later. A power struggle broke out between Magadha, Kosala, Vrijji and Avanti. Eventually Magadha emerged as the dominant *mahajanapada* and established the first Indian empire. The first known ruler of Magadha was Bimbisara of the Haryanka dynasty. He extended the territory of Magadhan Empire by matrimonial alliances and conquests. By marrying off his sister to Prasenajit, ruler of Kosala, he received Kasi as dowry. He also married the princesses of Lichchhavis and Madra. He maintained friendly relations with Avanti but annexed Anga by military might. Thus, Magadha became a
