European Union consisting of 27 nations is the most advanced international regional organization that seeks to achieve economic, political and cultural integration. It has created European Parliament, European Council and European Commission. Euro is its currency and a large portion of the dream to create structures for the free movement of people, capital, service and goods has been realized. It has brought out the concept of 'Pooled Sovereignty' where the States share their decision-making powers with member-States of the regional organization foregoing their sovereignty, definitely a blow to the concept of nationalism and its cardinal feature of State sovereignty. The gradual emergence of the role and relevance of the United Nations indicates the march, though slow of the humanity towards a World Government that is a negation of nationalism and its political body the state.

It established a caliphate in the captured territories in Syria and Iraq in 2014 and appealed to the global Islamic community to be associated with the international jihad to establish a global Islamic State or universal Caliphate.

The environmental problems like climate change, acid rain, ozone depletion have been caused by factors within the nation but the consequences and remedies are transnational and beyond the capacity of nationalism and national States to solve. The environmental conservation responsibility is a global challenge and numerous multi-lateral environmental conferences have been conducted by global community to discuss and provide solutions.

The growth of information technology especially internet, mobile phones and social media have left a profound impact on the concept of nationalism. It has sided with internationalism. The national State cannot effectively protect its nationalism and national interests as cross border transmission of ideas and networks become stronger.

The communication revolution has shrunk the world and the idea of the global village gains momentum that in the long run may jeopardize nationalism.

Nevertheless, it cannot be denied that nationalism continues to be a strong ideology in the 21st century too. The end of nationalism is not observable even in the distant horizon. The State still retains with itself the priceless feature of sovereignty. The ultimate deciding factor of internationalism is still nationalism and national interests.
