Evaluation

1ZXF6

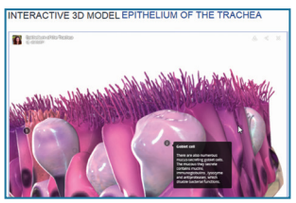

1. The main function of the cuboidal epithelium is
   a. Protection
   b. Secretion
   c. Absorption
   d. Both (b) and (c)
2. The ciliated epithelium lines the
   a. Skin b. Digestive tract
   c. Gall bladder **d. Trachea**
3. What type of fibres are found in connective tissue matrix?
   a. Collagen b. Areolar
   c. Cartilage d. Tubular
4. Prevention of substances from leaking across the tissue is provided by
   a. Tight junction
   b. Adhering junction
   c. Gap junction
   d. Elastic junction
5. Non-shivering thermogenesis in neonates produces heat through
   a. White fat **b. Brown fat**
   c. Yellow fat d. Colourless fat
6. Some epithelia are pseudostratified. What does this mean?
7. Differentiate white adipose tissue from brown adipose tissue.
8. Why blood is considered as a typical connective tissue?
9. Differentiate between elastic fibres and elastic connective tissue.
10. Name any four important functions of epithelial tissue and provide at least one example of a tissue that exemplifies each function.
11. Write the classification of connective tissue and their functions
12. What is an epithelium? Enumerate the characteristic features of different epithelia.

ICT Corner

The Online Epithelium

Let's explore the anatomy and functions of **Epithelium Tissues**.

Step – 1 Use the URL to open 'The Online Epithelium'page. Click any of the organ given in the list to view the interactive epithelial tissues present in that organ.

Step – 2 Click the play icon to load the 3D interactive. The loaded 3DTissue can be viewed 360 degree by click and drag of the mouse.

Step – 3 Roll the mouse over the interactive diagram and click the number on the diagram. A brief description of the parts will appear, description can be viewed by selecting the parts given at the bottom of the activity window.

Step – 4 Additional information regarding the particular epithelial tissue can be learned from the descriptions given below the 3D interactive diagram.
