In the words of Kohler, "*Accounting standards are codes of conduct imposed by customs, law or professional bodies for the benefit of public accountants and accountants generally*"

Thus, Accounting Standards are written policy documents issued by the expert accounting body or by government or other regulatory body covering the aspects of recognition, measurement, treatment, presentation and disclosure of accounting transactions and events in the financial statements.

2.5.1 Need for accounting standards

The need for accounting standards is as follows:

(i) To promote better understanding of financial statements

(ii) To help accountants to follow uniform procedures and practices

(iii) To facilitate meaningful comparison of financial statements of two or more entities.

(iv) To enhance reliability of financial statements

(v) To meet the legal requirements effectively

2.6 International Financial Reporting Standards (IFRS)

International Financial Reporting Standards (IFRS) are issued by the International Accounting Standard Board (IASB). IFRS is a set of International Accounting Standards stating how particular types of transactions and other events should be reported in financial statements. IFRS are issued to develop Accounting Standards that would be acceptable worldwide and to improve financial reporting internationally.

2.7 Accounting Standards in India

In India, Standards of Accounting is issued by the Institute of Chartered Accountants of India (ICAI). The Council of the Institute of Chartered Accountants of India constituted Accounting Standards Board (ASB) on 21st April, 1977 recognising the need for Accounting Standards in India. ASB formulates Accounting Standards so that such standards may be established by the Council of the Institute in India. The ASB will consider the applicable law, custom, usage, business environment and the International Accounting Standards while framing Accounting Standards (AS) in India.

Due to globalisation, the accounts prepared in India must be compatible with accounts prepared in other countries. This has resulted in the existing AS being converged with the IFRS. This convergence has resulted in what is known as Ind AS. Ind AS are basically the International Accounting Standards which have been modified in accordance with Indian accounting practices, customs and traditions. Presently, all big companies have to follow Ind AS rules, but smaller business units are allowed to continue using AS. In future, it is expected that all business entities in India will migrate to Ind AS.
