10.9 Calculation of profit or loss on sale of asset

Sometimes, a business may sell an asset. In that case, the profit or loss on sale is to be calculated and accounted in the books. To find the profit or loss on sale of asset, the book value of the asset on the date of sale and the sale price are to be compared. Book value of the asset on the date of sale is calculated by subtracting the total depreciation provided on the asset from the date of its purchase or construction to the date of sale from the original cost of the asset. If the sale price is more than the book value of the asset, the difference is profit. On the other hand, if the book value of the asset is more than the sale price, the difference is loss.

Book value = Cost of the asset – Total depreciation provided upto the date of sale

Profit on sale = Sale price – Book value (Sale Price > Book Value)

Loss on sale = Book Value – Sale price (Sale Price < Book Value)

Solution

Calculation of profit or loss on sale of machinery

Particulars		₹
Cost price		75,000
Less: Depreciation for 2016-17	(75,000 x 10%)	7,500
		67,500
Less: Depreciation for 2017-18	(75,000 x 10%)	7,500
Book value on the date of sale		60,000
Less: Selling price		62,000
Profit on sale		- 2,000

The selling price is more than the book value on the date of sale of machinery. Hence, the difference ₹ 2,000 is profit on sale of machinery.
