Solution

Procedure

1. Open new excel sheet.
2. Input the table as given in the question.
3. Enter the data "Achieved" in Cell D1.
4. Type the following in Cell D2:

   =OR(B2>=500,C2>=500)
5. Copy the formula from D2 into D3 and D4

Output

Counter	Day 1 sales ₹	Day 2 sales ₹	Achieved
Ground Floor	600	600	TRUE
First Floor	850	300	TRUE
Second Floor	350	400	FALSE

Illustration 6 (IF function)

Following is the list of students and percentage of marks obtained by them. If a student has secured a minimum of 50%, he is declared pass, else fail.

Student	Percentage of marks
1	59
2	60
3	65
4	45
5	35

Solution

Procedure

1. Open new excel sheet.
2. Input the table as given in the question.
3. Enter the data "Result" in Cell A3.
4. Type the following in Cell B3

   B3=IF(B1>=50,"Pass"",""Fail")
5. Copy the formula from B3 to C3, D3 and E3

Output

Student	% of marks	Result
1	59	Pass
2	60	Pass
3	65	Pass
4	45	Fail
5	35	Fail
