7.7 Social Infrastructure

Social infrastructure refers to those structures which are improving the quality of manpower and contribute indirectly towards the growth of an economy. These structures are outside the system of production and distribution. The development of these social structures help in increasing the efficiency and productivity of manpower. For example, schools, colleges, hospitals and other civic amenities. It is a fact that one of the reasons for the low productivity of Indian workers is the lack of development of social infrastructure. The status and developments in the social infrastructure in India are discussed below.

7.7.1 Education

a. Education in India

Imparting education on an organized basis dates back to the days of 'Gurukul' in India. Since then the Indian education system has flourished and developed with the growing needs of the economy. The Ministry of Human Resource Development (MHRD) in India formulates education policy in India and also undertakes education programs.

b. Education system in India

Education in India until 1976 was the responsibility of the State governments. It was then brought under concurrent list (both Centre and State). The Centre represented by the Ministry of Human Resource Development decides India's education budget.

The education system in India primarily consists of six levels:

- *Nursery Class*
- *Primary Class*
- *Secondary Level*
- *Higher Secondary Level*
- *Graduation*
- *Post-Graduation*

c. Education Institutions in India:

Education in India follows the 10+2 pattern. For higher education, there are various State run as well as private institutions and universities providing a variety of courses and subjects. The accreditation of the universities is decided under the University Grants Commission Act. The Education Department consists of various schools, colleges and universities imparting education on fair means for all sections of the society. The budget share of the education sector is around 3% of GDP largest proportion of this goes for school education. However, per pupil expenditure is the lowest for school students.

7.7.2 Health

a. Health in India

Health in India is a state government responsibility. The Central Council Of Health and Welfare formulates the various health care projects and health department reform policies. The administration of health industry in India as well as the technical needs of the health sector are the responsibility of the Ministry Of Health And Welfare.

Health care in India has many forms. These are the Siddha medicine, Ayurvedic
