

# Unit 3

# Lithosphere: Endogenic Processes

## Chapter Outline

**3.1** Introduction
**3.2** Interior of the Earth
**3.3** Continental Drift Theory
**3.4** Plate Tectonics
**3.5** Plate boundaries
**3.6** Convection Cell
**3.7** Fold
**3.8** Fault
**3.9** Earthquake
**3.10** Volcano
**3.11** Rocks
**3.12** Rock Cycle

## Learning Objectives:

- *Understand the structure and composition of the Earth.*
- *Develop an insight into the Continental Drift Theory.*
- *Describe the concept of Plate Tectonic movement.*
- *List and compare the characteristics and distribution of the earth's internal forces*
- *Explain rock types and rock cycle*

## 3.1 Introduction

Do you know that the Russians tried to dig through the centre of the Earth? It indeed is a daring attempt.

While the famous Voyager 1 satellite took 26 years to exit our Solar System (16.5 billion km away), almost the same amount of time (24 years) was taken for man to dig out a mere 12.3 km into the earth's surface.

Russia drilled Kola Super Deep bore hole between 1970 and 1994. The deepest
