ICT CORNER

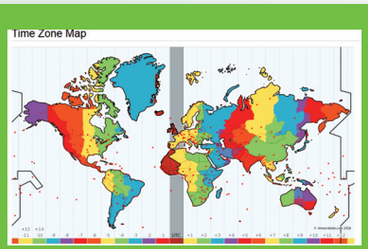

Lithosphere Morphing Boundaries

Through this activity you will identify the land masses formed by Endogenic processes.

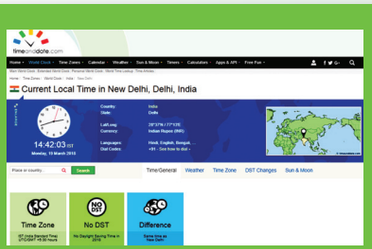

Steps

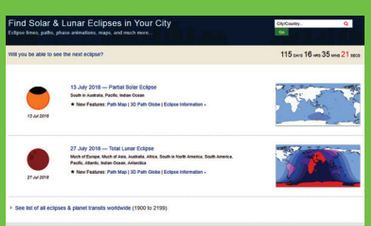

- Use the URL to land on 'Google Earth' or scan the QR code from your smartphone.
- Open "Google Earth" app and type "Everest" in the search box to explore the folded mountain structure created by tectonic collision.
- Type volcano name in search box and explore the landscape formed by its eruption.
- Roll over the globe using your mouse and zoom in and zoom out to explore the land mass and its tectonic plate extensions.
