feminism as its beloved friend. Patriarchy means domination of man over women. Eco-feminism argues that patriarchy created the domination of man over not only women but over nature also. Patriarchy follows instrumental reason whereby both women and ecology are seen merely in terms of use value, as objects to be exploited and not as subjects endowed with life and intrinsic worth. Eco- feminism demands gender and ecology sensitive politics so that a new world of justice and sustainability can be established.

B) Modernist Ecology

Modernist ecology is synonymous with shallow ecology. It attempts to promote a new harmony between liberalism and ecology. The liberal tenets and approach should be reformed so that the menace of ecological destruction can be avoided. It advocates a new 'enlightened anthropocentricism' where man, being the centre of the planet must consider the long-term interests of humanity and ecology in his developmental activities and should not be driven solely by short-term interests. Modernist ecology believes in the concept of "inter-generational justice" and argues that we did not inherit the earth from our previous generations but borrowed it from the future generations of humanity and therefore, there is a moral responsibility to protect and preserve the earth for their life in the future. The concept of 'sustainable development' is a basic characteristic of modernist ecology. It argues that 'getting richer faster' should not be the goal of human world rather 'getting richer slower' should be its guiding approach.

C) Deep Ecology

It advocates a new style of politics, policy and political attitude towards nature. It argues for a fundamental shift in the relationship between politics and nature. Politics must understand, respect and protect the element of inter connectedness found in ecology linking the human beings, other biological forms and the inanimate world.

Ecological Movements in India

The destruction of ecology through modern development had resulted in the emergence of many protest movements all over the world. India also has witnessed many ecological protest movements seeking to protect environment and biodiversity. We shall study four such important ecological movements of India

A Bisnoi Movement
B Chipko Movement
C Appiko Movement
D Save Silent Valley Movement

A. Bisnoi Movement

Bisnoi non-violent struggle was a successful ecological movement in the 18th century in Rajasthan. Bisnoi is a religious sect in the Thar desert of Rajasthan founded by Guru Jambeshwar in medieval period. Bisnoi in Hindi means 29 and the sect came to be named after the 29 cardinal principles the founder expounded. The sect promoted a socio-religious belief system in perfect harmony with ecology creating a lush green local ecosystem in the desert.
