Write a program to perform addition of two matrices

```
#include<iostream>
#include<conio>
using namespace std;
int main()
{
        int row, col, m1[10][10], m2[10][10], sum[10][10];
        cout<<"Enter the number of rows : ";
        cin>>row;
        cout<<"Enter the number of columns : ";
        cin>>col;
        cout<< "Enter the elements of first matrix: "<<endl;
        for (int i = 0;i<row;i++ )
        for (int j = 0;j <col;j++ )
        cin>>m1[i][j];
        cout<< "Enter the elements of second matrix: "<<endl;
        for (int i = 0;i<row;i++ )
        for (int j = 0;j<col;j++ )
        cin>>m2[i][j];
        cout<<"Output: "<<endl;
        for (int i = 0;i<row;i++ )
        for (int j = 0;j<col;j++ )
        {
        sum[i][j]=m1[i][j]+m2[i][j];
        cout<<sum[i][j]<<" ";
        }
        cout<<endl<<endl;
        }
getch();
return 0;
}
```

```
Enter the number of rows :   2
Enter the number of column : 2
Enter the elements of first matrix:
1
1
1
1
Enter the elements of second matrix:
1
1
1
1
Output:
2   2
2   2
```
