Illustration 15.6 Concatenation of string using operator overloading

```
#include<string.h>
#include<iostream>
using namespace std;
class strings
{
        public:
        char s[20];
        void getstring(char str[])
{
        strcpy(s,str);
  }
        void operator+(strings);
};
void strings::operator+(strings ob)
{
        strcat(s,ob.s);
        cout<<"\nConcatnated String is:"<<s;
}
int main()
{
        strings ob1, ob2;
        char string1[10], string2[10];
        cout<<"\nEnter First String:";
        cin>>string1;
        ob1.getstring(string1);
        cout<<"\nEnter Second String:";
        cin>>string2;
        ob2.getstring(string2);
        //Calling + operator to Join/Concatnate strings
        ob1+ob2;
        return 0;
}
```

Output

```
Enter First String:COMPUTER
Enter Second String:SCIENCE
Concatnated String is:COMPUTERSCIENCE
```
