SECTION - D

Explain in detail

1. What are the rules for operator overloading?

2. Answer the question (i) to (v) after going through the following class.

```
class Book {
int BookCode ; char Bookname[20];float fees;
public:
Book( )                          //Function 1
{ fees=1000;
  BookCode=1;
  strcpy(Bookname,"C++");   }
void display(float C)            //Function 2
{   cout<<BookCode<<":"<<Bookname<<":"<<fees<<endl;   }
~Book( )                         //Function 3
{  cout<<"End of Book Object"<<endl;   }
       Book (int SC,char S[ ],float F)  ;          //Function 4
};
```

(i) In the above program, what are Function 1 and Function 4 combined together referred as?

(ii) Which concept is illustrated by Function3? When is this function called/ invoked?

(iii) What is the use of Function3?

(iv) Write the statements in main to invoke function1 and function2

(v) Write the definition for Function4.

3. Write the output of the following program

```
include<iostream>
using namespace std;
class Seminar
{ int Time;
public:
Seminar()
 {      Time=30;cout<<"Seminar starts now"<<endl;    }
void Lecture()
{ cout<<"Lectures in the seminar on"<<endl; }
Seminar(int Duration)
{   Time=Duration;cout<<"Welcome to Seminar "<<endl; }
Seminar(Seminar &D)
{   Time=D.Time;cout<<"Recap of Previous Seminar Content "<<endl;}
~Seminar()
```
