Evaluation

SECTION – A

Choose the correct answer

1. Which of the following is the process of creating new classes from an existing class

   (a) Polymorphism (b) Inheritance
   (c) Encapsulation (d) super class

2. Which of the following derives a class student from the base class school

   (a) school: student

   (b) class student : public school

   (c) student : public school

   (d) class school : public student

3. The type of inheritance that reflects the transitive nature is

   (A) Single Inheritance

   (B) Multiple Inheritance

   (C) Multilevel Inheritance

   (D) Hybrid Inheritance

4. Which visibility mode should be used when you want the features of the base class to be available to the derived class but not to the classes that are derived from the derived class?

   (A) Private (B) Public
   (C) Protected (D) All of these

5. Inheritance is a process of creating new class from

   (A) Base class (B) abstract
   (C) derived class (D) Function

6. A class is derived from a class which is a derived class itself, then this is referred to as

   (A) multiple inheritance

   (B) multilevel inheritance

   (C) single inheritance

   (D) double inheritance

7. Which amongst the following is executed in the order of inheritance?

   (A) Destructor (B) Member function
   (C) Constructor (D) Object

8. Which of the following is true with respect to inheritance?

   (A) Private members of base class are inherited to the derived class with private

   (B) Private members of base class are not inherited to the derived class with private accessibility

   (C) Public members of base class are inherited but not visible to the derived class

   (D) Protected members of base class are inherited but not visible to the outsideclass

9. Based on the following class declaration answer the questions (from9.1 to 9.4)

```
class vehicle
{ int wheels;
public:
void input_data(float,float);
void output_data();
protected:
int passenger;
 };
class heavy_vehicle : protected vehicle {
int diesel_petrol;
protected:
        int load;
public:
void read_data(float,float)
void write_data(); };
class bus: private heavy_vehicle {
char Ticket[20];
public:
void fetch_data(char);
void display_data(); };
```
